	•	09/136,820	SIMON, ISTVAN	
•	Office Action Summary	Examiner	Art Unit	
		Nicholas Ponomarenko	2834	
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status				
1) 🗌	Responsive to communication(s) filed on	·		
2a)⊠	,,,,,	nis action is non-final.		
3)	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims				
4)⊠	Claim(s) 1-19 is/are pending in the application	n.		
4a) Of the above claim(s) is/are withdrawn from consideration.				
5)[Claim(s) is/are allowed.			
6)⊠	Claim(s) <u>1-19</u> is/are rejected.			
7) 🗌	Claim(s) is/are objected to.

PTO-326 (Rev. 04-01)

Art Unit: 2834

DETAILED ACTION

Specification

- 1. The abstract of the disclosure is objected to because it is describing a device capable to "reuse" the energy of the downward movement of the water, i.e. makes an attempt to disclose a "perpetual motion" machine. Correction is required. See MPEP § 608.01(b).
- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of 37 CFR 1.71(a)-(c):

- (a) The specification must include a written description of the invention or discovery and of the manner and process of making and using the same, and is required to be in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which the invention or discovery appertains, or with which it is most nearly connected, to make and use the same.
- (b) The specification must set forth the precise invention for which a patent is solicited, in such manner as to distinguish it from other inventions and from what is old. It must describe completely a specific embodiment of the process, machine, manufacture, composition of matter or improvement invented, and must explain the mode of operation or principle whenever applicable. The best mode contemplated by the inventor of carrying out his invention must be set forth.
- (c) In the case of an improvement, the specification must particularly point out the part or parts of the process, machine, manufacture, or composition of matter to which the improvement relates, and the description should be confined to the specific improvement and to such parts as necessarily cooperate with it or as may be necessary to a complete understanding or description of it.

The specification is objected to under 37 CFR 1.71 because it fails to disclose a device that is functional or capable to operate, which means -- the specification is not enabling. Specifically, the disclosure fails to provide any structure or features that will support the newly amended statements, such as "... upward and downward movement

Art Unit: 2834

of the cascade assembly is afforded by overfilling of a cascade assembly in relation to the other (with water from a flowing water source...."

The specification does not contain a written description of the invention with specific details on how to make or use the invention, in full, clear, concise, and exact terms as to enable a person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and the specification does not set forth the best mode contemplated by the inventor of carrying out his invention.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims **1-19** are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility.

Doctrine or principle of the conservation of energy.

If the boundary considered includes the universe, the principle of the conservation of energy amounts to a statement that the sum total of the energy of the universe is a fixed unalterable quantity.

The principle of the conservation of energy also denies the possibility of "perpetual motion." By "perpetual motion" is meant the devising of some arrangement so that energy in one form can be produced without energy in some other form being used up by the machine. Thus if an engine could be made to do work on external

Art Unit: 2834

bodies for an indefinite time, and thus give out energy, without being supplied with energy from without, or diminishing the stock of energy in all its various forms which it originally possessed, we should have a means of creating energy, and this is in direct contradiction to the principle of the conservation of energy.

5. When a patent applicant presents an application describing an invention that contradicts known scientific principles, or relies on previously undiscovered scientific phenomenon, the burden is on the examiner simply to point out this fact to the appellant... The burden shifts to appellant to demonstrate either that his invention, as claimed, is operable or does not violate basic scientific principles, or that those basic scientific principles are incorrect. As stated by the Patent Office Board of Appeals, Newman v. Quigg 681 F. Supp 16, at18, 5 U.S.P.Q. 2d 1880(1988).

Applicants are required to furnish a working model of their invention in order to demonstrate its operability. See MPEP § 608.03.

Response to Arguments

6. Applicant's arguments filed on June 19, 2001 have been fully considered but they are not persuasive. The device, as disclosed, is not operable. The confusing and misleading attempts of the applicant to show its operability do not hold any ground since the disclosed structure is in conflict with the claimed possibility of operation by the external source of water.

Application/Control Number: 09/136,820

Art Unit: 2834

Conclusion

7. This is an RCA of applicant's earlier Application No. 09/136,820. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. When the claims are amended, applicant(s) should state in detail where in the original disclosure or in the drawings the amended features find support.

No new matter may be introduced.
